---

As a graduate in Software Engineering, I am proficient in HTML, CSS, JavaScript, React, and Next.js. I am committed to creating user-friendly solutions and enthusiastic about contributing to dynamic web projects as part of a collaborative Software Development team. Although I do not have working experience, I am looking forward to gaining it and growing within a professional environment.

### Projects

#### 1. Name of the Project: UR Budget Pal

- Tech Stack: Javascript, React.js and CSS3
- Description: This is a Budget app that allows users to create their monthly budget by calculating their total income and expenses and determining the balance for the month.
- Link to the Project: [Ur-budget-pal](#)

#### 2. Name of the Project: Cooking Devs

- Tech Stack: HTML, CSS, JavaScript, Nextjs and MongoDB
  - Company: CodeSpace Academy
  - Description: This is a Recipe App. I did it as my final project in JavaScript Engineering. I was involved in an Agile. Our Recipe App offers a seamless culinary experience, boasting features like recipe card display, filtering options, search functionality, favourites management, editing capabilities, theme toggling, pagination, and detailed recipe previews.
